

Guaranteed Success Program

At NewLife Fertility, We Believe In Success.

We want to partner with you in achieving our shared goal of pregnancy success. Our expert physicians and staff are dedicated to using their knowledge and expertise to maximize your chances to achieve your dream of having a baby.

Because we believe in our outstanding clinical expertise and pregnancy success statistics, we offer a risk sharing, financial plan. Our **Guaranteed Success** Plan is based on the principle of mutual commitment. We are so confident in our ability to deliver, that we back our commitment with a **Money Back Guarantee**.

Money-Back IVF Guarantee

Should a qualified participant not achieve a successful pregnancy as defined as a live birth, the refundable portion of the program will be returned so that alternatives can be pursued.

Plan Details

Three fresh IVF cycles

The refund plan includes up to three fresh IVF cycles and additional frozen-embryo cycles, should they be available, to achieve a successful pregnancy. The plan is considered successful if a live birth results.

Plan Cost: \$22,000

- ✓ Should a successful pregnancy as defined as a live birth not be attained following three fresh IVF attempts and all frozen embryo transfers, if any, then **70% or \$15,400** will be refunded with **30%, \$6,600** retained for administrative program costs.
- ✓ A financial consult at no charge is also necessary for eligibility before your cycle starts.
- ✓ Additional costs may be incurred based on additional parameters.
- ✓ Prices are subject to change without notice; however, your price will not change once your fee is paid.

Services Covered

- ✓ Cycle monitoring if performed in one of our offices
- ✓ Egg retrieval
- ✓ Fertilization
- ✓ ICSI
- ✓ Assisted Embryo Hatching (if required)
- ✓ Frozen embryo transfer and subsequent freezing.
- ✓ Cryopreservation and storage of embryos deemed suitable for freezing for up to six months after retrieval in our facility.

Procedures covered under OHIP*

****If you are not covered by OHIP, these costs will not be covered in the plan, and you will have to bear the cost.***

- ✓ Initial office visit and all subsequent office consultations
- ✓ Interim procedures (office hysteroscopy, endometrial biopsy, if indicated)
- ✓ Hospitalizations/complications
- ✓ Pregnancy testing and early pregnancy ultrasound monitoring.

Services Not Covered

- ✗ Prescreening tests (laboratory blood work, HSG, US, semen analysis).
- ✗ Medications.
- ✗ Cycle monitoring if performed in other than one of our offices.
- ✗ Male services/facility cost should PESA/TESA be indicated.
- ✗ Embryo storage beyond six months.
- ✗ Frozen Embryo Transfer cycles following pregnancy success should frozen embryos remain.
- ✗ Sperm freezing for cycle, if indicated.
- ✗ PGD/PGS testing, if indicated.

Plan Eligibility

- ✓ In order to be eligible for the refund plan, a participant must meet all the requirements of our regular fee-for-service IVF program and must not have had a prior unsuccessful IVF cycle.
- ✓ Eligibility may be considered on a case-by-case basis if a prior unsuccessful IVF cycle is thought to have been due to a potentially correctable condition such as polyps, fibroids or uncorrected hydrosalpinges.

Female Requirements

- ✓ Female partner must complete her cycles before her 38th Birthday.
- ✓ The female partner must have no history of FSH > 10 on day 2-5. (Blood work must be performed in our laboratory).
- ✓ Female must have a BMI >19 and < 27.
- ✓ Normal AHA level.
- ✓ AMH level should be > 15
- ✓ The female partner should have no history of poor response (<5 eggs)
- ✓ No history of poor oocyte quality
- ✓ Normal uterine cavity and no hydrosalpinges. (If present, they must be removed or the fallopian tubes ligated prior to acceptance into the program).
- ✓ No contraindication to IVF treatment or pregnancy.
- ✓ Female must have no history of >1 miscarriage.

Male Requirements

- ✓ Male partner must be <55 years of age.
- ✓ Sperm morphology > 1% normal
- ✓ Sperm parameters must be adequate for ICSI with at least 100,000 sperm per ejaculate.
- ✓ Males are eligible following PESA/TESA if they had a prior vasectomy.

Couple Requirements

- ✓ Must be non-smokers. ****Please note that this is of utmost importance, and we will get this verified. Failure to comply may lead to disqualification from the program.***
- ✓ Must inseminate all eggs.
- ✓ Must accept embryo cryopreservation if indicated.

Cycle Requirements

- ✓ Endometrium should be > 7 mm mid cycle
- ✓ Follicle count must be > 10
- ✓ Must have four follicles between 14-18 mm on day of HCG and estradiol $\geq 1,000$ pg/mL.
- ✓ To remain eligible in the program the female must have at least eight mature eggs at retrieval if age ≥ 30 and two ovaries or at least six mature eggs at retrieval if age <30 and or one ovary.
